Square collection in wenge

HIGH-END HARDWARE AND FITTINGS

Since being founded in Paris in 1975, the **Serdaneli** brand has preserved its unique know-how, inspired by the world of watchmaking. The design of each piece is revealed both in its sculptural form and in the use of exceptional materials such as crystal, semi-precious stones and leather.

Thanks to its expertise and the richness of its library of materials, **Serdaneli** has created a wide array of fittings, accessories and hardware in collaboration with renowned manufacturers. The company also creates entirely personalized models for many of its clients.

Today, **Serdaneli** is recognized worldwide for the quality and finesse of its products, which can be found in the most prestigious residential projects and yachts.

MATERIAL AS A HALLMARK

Complementary to its unrivalled craftsmanship, **Serdaneli's** uniqueness lies in its library of materials which has been constantly added to over the years. Marble, mother-of-pearl, sodalite, onyx, jasper or wenge, **Serdaneli** offers more than fifteen meticulously selected materials. These are transformed either in the brand's workshops or by artisans who share the same values and standards of quality.

No less than 32 stones are embedded in the Square collection fittings. Designed like pieces of jewellery, Serdaneli's most elaborate creations are the result of meticulously executed setting by the brand's craftsmen.

The new Hemisphere collection has a resolutely contemporary design. The purity of the finely engraved porcelain decorated with a white satin enamel contrasts with the strength of the metal worked in different finishes.

Most recently, **Serdaneli** has partnered with J.L Coquet to offer a series of fittings with a Limoges porcelain handle, inspired by the iconic Hemisphere model, and accompanied by a range of accessories (available from Cristal&Bronze).

Among its latest products, **Serdaneli** has also partnered with Jaune de Chrome - renowned for its high-temperature enameling technique - to create a collection of 9 porcelain basins with unique designs.

The Serdaneli X Jaune de Chrome basins feature intense and sophisticated colours. Available in 9 designs across 2 lines, they are attractive thanks to their originality and their subtle, mineral appearance.

Serdaneli entrusted the production of the Sakura range inserts to Tomioka, a Japanese company specialised in Kabazaiku, the art of working cherry tree bark.

For its collections adorned with crystal, marble and fine stone, **Serdaneli** works with various companies recognized for their originality and their excellence in France, Europe and Japan: Pauly Factory, Vista Alegre, Waltersperger, Ematek, Cristal Benito, Tomioka to name but a few.

These prestigious partnerships have elevated **Serdaneli** to the rank of master craftsmen. The collections pair each material with a wide range of metal finishes from the most traditional, such as chrome or nickel, to the most prestigious, such as 24-carat gold and silver. Each finish is also available in different aspects: matt, velvet and polished.

The craftsman Franck Benito reworked Serdaneli's Sky collection. He created a crystal insert with pure and geometrical lines, bringing brightness and softness to the touch.

SUBTLE STYLE

Serdaneli fittings are grouped into different product lines and are complemented by a selection of accessories and hardware to suit every need.

In a contemporary, classic or bold style, each collection transforms the bathroom into a real showcase.
